ROBUST RANGE

EURO HIGHWAY SAFETY - ROBUST RANGE

Our traffic cone range guarantees security and reliability, fully complying with Chapter 8 and conforming to requirements of BS EN 13422.

As forerunners in the road safety industry our highway cones are the new benchmark for safer roads.

With a product built for quality and longevity we are committed to eco-friendliness, and our cones are made entirely out of recyclable PVC plastic.

Features:

- Made from soft PVC plastic for maximum flexibility
- 3M reflective sleeve
- Easily stackable saving space and time
- 100% recyclable
- Extremely impact resistant
- Durable, even in the cold temperatures
- Fluorescent colour chosen for maximum daytime visibility

THE **ROBUST**
RANGE IS

EFFECTIVE
IN WET
CONDITIONS

**OUR ROBUST RANGE
FULLY COMPLIES
WITH
CHAPTER 8 AND
BS EN 13422**

BSEN 13422:2004+A1:2009

Category	B
Class	S1
Chromaticity co-ordinates and luminance factors daylight appearance	Compliant
Coefficient of retroreflection 'R' for night time appearance	Compliant
Coefficient of retroreflection 'R' in wet conditions	Compliant
Stability of traffic cones	Compliant
Drop resistance of traffic cones	Compliant
Adhesion of retroreflective surfaces	Compliant
Resistance to damage at low temperature	Compliant
Continuity of retroreflective surfaces	Compliant

CUSTOMIZE YOUR SIGN

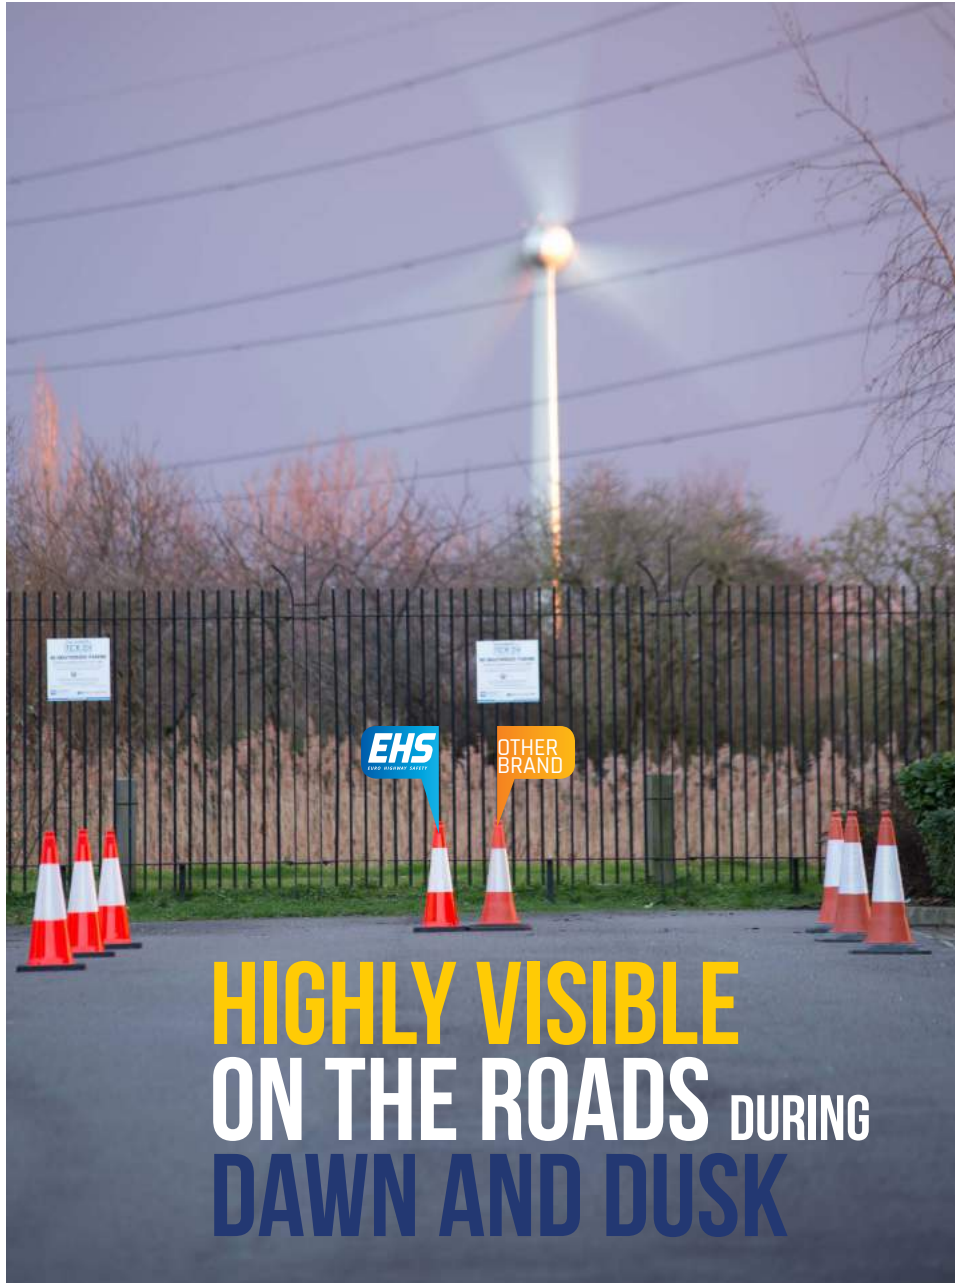

BRANDING YOUR CONE

Branding your cones doesn't only advertise your company name, but identifies the cones ownership (BS EN 13442 Anti-theft markings).

Robust cones can be branded with the print of your choice, fast and efficiently, on low and high quantity orders.

DAY AND NIGHT VISIBILITY

- **HIGHLY VISIBLE ON THE ROADS DURING DAWN AND DUSK**
- *3M flexible prismatic reflective sheeting (class R2), offers superior safety in all conditions*
- *High durability, ensuring effectiveness even after constant handling and abuse*
- *Effective for temporary traffic control, short-term work zones, repair calls and emergency responses*

- 3M 3340
- MINIMUM CLASS R2
- MINIMUM CLASS R1

NO WAITING CONE

EHS 'No Waiting' cones are commonly used for road resurfacing operations. During such operation, heavy machinery is used and safety traffic cones are likely to get damaged or even become unusable. Many traffic cones are then wasted, causing harm to the environment and money loss. Investing in EHS 'No Waiting' cones for such operations can save you money without abusing the environment we live in.

Features:

- Extremely impact resistant
- Lightweight with a supporting base, so can be dropped easily onto the road
- Fluorescent colour throughout for high visibility day and night
- Made from soft PVC plastic for maximum flexibility
- 100% recyclable
- Resilient in cold and wet weather conditions

OTHER PRODUCTS

CONE BAR AND TAPPING RAIL

- Quick and easy to install
- Effective way to control traffic flow
- Can be used to restrict access to an area
- Accessible from 136 cm to 222 cm and fits perfectly to all types of cones
- Striking by day and highly visible by night

CONE CLIP SIGN

- Durable and resistant
